

# Yoannis Sánchez Soto

## Full-Stack Developer

---

### Skills

#### Frontend:

React, Next.js, Vue, Svelte,  
TypeScript, TailwindCSS

#### Backend:

Node.js, Prisma ORM, Firebase,  
AppWrite

#### AI & Media Processing:

ONNX Runtime, Sharp, Puppeteer

#### Mobile & Desktop:

Capacitor, Electron, Tauri (*Xamarin,  
WPF - past experience*)

#### Tools & Others:

Git, Linux, Docker basics, CLI Tools,  
Technical SEO

---

### Languages

Spanish - Native

English — B1 Certified  
(Intermediate)

---

### Contact

Location: Holguín, Cuba

### Resume

Full-Stack Developer with 3+ years of experience building modern web applications, SaaS platforms, AI-powered tools, and cross-platform solutions. Specialized in React, Next.js, TypeScript, and Prisma, with a strong focus on clean architecture, performance optimization, and high-quality UI/UX. Experienced working in both structured engineering teams and fast-paced startup environments, delivering scalable, maintainable, and user-centered products from concept to production.

---

### Work Experience

#### Monkey Casting / Freelance Full-Stack Developer

DEC 2024 - PRESENT (PART-TIME), REMOTE

An upcoming startup building a large-scale platform connecting agencies and talents.

- Principal developer building a multi-role casting platform for agencies, talents, and admins.
- Implemented role-based dashboards for talents, agencies and admins
- Developed digital auditions, chat, portfolios and submission flows
- Built internal tools for moderation, castings, audit logs and reporting
- Implemented a real-time chat system between agencies and talents using external APIs.
- Ensured performance, security, and best practices

## **Einsof / ReactJS Developer**

DECEMBER 2024- APRIL 2025 (CONTRACT / FULL-TIME), REMOTE

Full-time contract as part of a structured development team.

- Developed high-performance e-commerce modules and landing pages within a structured Agile team
- Added new features and improved modules in sales/e-commerce platforms.
- Translated complex Figma designs into pixel-perfect, accessible React interfaces
- Used React, Astro, Material UI and TailwindCSS to implement modern, scalable front-end architecture.
- Optimized frontend architecture and participated in rigorous code reviews to ensure UI/UX consistency.

## **CluzStudio / Freelance Full-Stack Developer**

JUNE 2024- SEPTEMBER 2024, REMOTE

Worked on multiple management and internal tools for clients using the Next.js + Prisma stack.

- Modernized internal management tools by refactoring legacy components into scalable Next.js patterns
- Improved UI/UX and refactored legacy components into modern patterns
- Added new modules and features to existing codebases, improving usability, UI consistency and performance.

## **Ola Cake Manager / Freelance Full-Stack Developer**

SEPTEMBER 2024 - OCTOBER 2024, REMOTE

Management system for a bakery with offline capabilities and local network sharing.

- Built a complete management platform using Next.js + Prisma, allowing the client to control every stage of their cake production workflow (from order creation to preparation, decoration, delivery, and final approval).
- Developed a product inventory system with stock tracking, updates, and usage logs adapted to the bakery's real workflow.
- Implemented Offline Mode, enabling the system to work without internet connection and stay fully functional inside the client's local environment.
- Created a custom Node.js script that runs the compiled Next.js app as a standalone local server.
- Packaged the system into a single executable, simplifying installation and usage for non-technical users.
- Implemented local network sharing, allowing multiple devices to access the system simultaneously without external hosting.

- Delivered a robust, production-ready system tailored to a real business, earning high client satisfaction.

## **Freelance Full-Stack Developer**

2023 - PRESENT, REMOTE

Worked with multiple clients delivering production-ready solutions across web, SaaS, landing pages, and management systems.

- Delivered landing pages, company websites, and marketing funnels using Next.js, Astro and Tailwind.
  - Built small and medium-size management systems (inventory, CRM-like tools, client dashboards, appointment systems, etc.) while maintaining client confidentiality.
  - Developed custom full-stack solutions including authentication, form processing, admin dashboards, file uploads, and integrations with third-party APIs.
  - Implemented optimizations for performance, SEO and Core Web Vitals, improving loading times and user engagement.
  - Collaborated directly with clients to translate business requirements into working software, ensuring 100% client satisfaction.
  - Delivered maintainable codebases using TypeScript, Prisma, React, Next.js and best practices.
  - Worked with role-based access control, media processing, and internal tools depending on client needs.
-

## Projects

### **i18nizer** / Creator & Full-Stack Developer

2025

AI-powered CLI tool that automates JSX/TSX string extraction and i18n JSON generation using AST transformation and LLMs.

- Developed a CLI tool to automate internationalization (i18n) workflows for React and Next.js applications.
- Implemented AST-based code transformation to automatically extract hardcoded strings and replace them with translation hooks.
- Integrated AI providers (OpenAI, Gemini, DeepSeek) for intelligent semantic key generation and automated translations.
- Designed a local caching system and configuration schema to ensure deterministic and cost-effective processing.

### **Removerized** / Creator & Full-Stack Developer

2024

AI-powered background remover with offline mode and server-side processing.

- Built a full-stack image processing tool using Next.js, ONNX AI models, and TypeScript, capable of removing backgrounds and processing batches of images.
- Designed a hybrid architecture combining local on-device AI inference and server-side GPU processing for broader compatibility.
- Achieved 2nd place on DevHunt, gaining visibility and positive community feedback.
- Reached 600+ stars on GitHub.
- Implemented offline support using PWA technology
- Built a modern UI with Tailwind and server actions for near-instant processing workflows.

### **Karbonized** / Creator & Full-Stack Developer

2024

Cross-platform tool for creating visual assets like code mockups, device mockups and text compositions.

- Designed and developed a visual editor inspired by Photoshop-like workflows, allowing users to drag & drop pre-designed components (code blocks, device frames, styled text, etc.) to create custom images.
- Built to run offline as both a PWA and a fully packaged Electron desktop app, available for multiple platforms.
- Created to provide an offline-first alternative to online design tools and subscription-based editors.

- Implemented custom rendering logic, export flows, theme systems, and a flexible component structure to allow users to build complex mockups easily.
- Gained traction within developer communities as a lightweight alternative to existing online tools.

---

## Education

---

**Universidad de Holguín (UHo) / Informatics Engineer**

2022 - (Expected Graduation: 2026), Cuba
